

PATCH MANAGER

AUTOMATED PATCHING OF MICROSOFT SERVERS AND 3RD-PARTY APPS

 **DOWNLOAD FREE TRIAL**

Fully Functional for 30 Days

"What's great about SolarWinds Patch Manager is that everything is right there in a single interface, having a one-stop shop for patches and updates makes a world of a difference!"

—Brendon DeMuth City of Roseburg Technical Support

SolarWinds Patch Manager makes it easy to perform 3rd-party patch management across tens of thousands of servers and workstations, and enables you to leverage and extend the capabilities of Microsoft WSUS or SCCM to report, deploy, and manage 3rd-party patches as well as Microsoft patches.

PATCH MANAGER AT A GLANCE

- » Reduce time from weeks to minutes for patching physical and virtual Windows desktops and servers with pre-built, tested patches from vendors such as Adobe, Apple, Google, Mozilla, Oracle and others
- » Decrease security risks and service performance degradation by controlling when and where patches are applied
- » Pass audits and demonstrate compliance with out-of-the-box reports and dashboard views
- » Turn your WSUS or SCCM environment into a powerful patch management solution
- » Agent-less architecture, mass scale, and ease of use gives you the best ROI with no scripting or professional services needed

PATCH MANAGER FEATURES

Intuitive Web Interface

Patch Manager's web user interface lets you view important patch management data alongside other SolarWinds products in an integrated web console. You can view the latest available patches, top 10 missing patches in your environment, and general health overview of your environment based on which patches have been applied.

Extend System Center Configuration Manager

SolarWinds Patch Manager extends your Microsoft SCCM deployment with pre-tested, pre-built 3rd-party updates and provides many time-saving management features to help you get more out of your Configuration Manager investment.

Patch Compliance Reporting

SolarWinds Patch Manager provides you with easy-to-use and powerful reporting options so that you can easily determine the status of patches and demonstrate to auditors that systems are patched and compliant - or find those that are not.

Extended Power of Microsoft WSUS

SolarWinds Patch Manager works with and extends Microsoft WSUS to give you more control and power over the patch management process with dynamic patch management, immediate updates, scheduled reboots, easy reporting, full asset inventory, and more.

Simplified Patch Management

SolarWinds Patch Manager simplifies many of the steps in the patch management process - from research, to scheduling, to deployment, to reporting and more - saving you hours of time and making it easier to keep hundreds or hundreds of thousands of servers and workstations patched and compliant.

Centralized Patching of Microsoft Servers and Third-Party Apps

SolarWinds Patch Manager enables you to deploy and manage both 3rd-party applications and Microsoft patches, from a central point of control, across tens of thousands of servers and workstations. Microsoft SCUP and complicated scripting NOT required.

Pre-Tested, Pre-Built Packages for Common Apps

SolarWinds builds, tests, and automatically delivers packages for common 3rd-party applications which can then be quickly and easily deployed using Microsoft WSUS or Microsoft SCCM.

Custom Package Wizard

The Custom Package Wizard in SolarWinds Patch Manager gives you an easy way to build custom packages for any application, without the use of SCUP or complicated scripting. Then, using SolarWinds Patch Manager, you can deploy any MSI, MSP or EXE via Microsoft WSUS or SCCM.

Advanced Before-and-After Package Deployment Actions

SolarWinds Patch Manager's PackageBoot™ allows you to create advanced before and after package deployment scenarios to help ensure that even the most complicated patches (such as Oracle Java) get deployed successfully - without complicated scripting.

Fully Functional for 30 Days

**TRY BEFORE YOU BUY.
DOWNLOAD A FREE TRIAL!**

Patch management has never been simpler! Don't just take our word for it. SolarWinds Patch Manager lets you deploy patches across your Windows servers and workstations in hours - not weeks. Download your free, fully-functional trial today!

Patch Physical Servers and Virtual Machines

SolarWinds Patch Manager makes it easier to manage patches on virtual desktops and servers with the ability to patch off-line machines, organize virtual machines into groups, and inventory virtual machines enterprise-wide.
