

Vulnerability Intelligence for ALL your Applications and Systems

Reduce security risk with verified, accurate and comprehensive intelligence from Secunia Research

Benefits to Your Organization:

- **Reduce Exposure to Hacks** Use the latest insights from Secunia Research to drive remediation efforts.
- **Stay Informed** Get advisories, alerts, tickets, reports and visibility into software vulnerabilities and security patches to react faster.
- **Cut Through the Noise** Focus your vulnerability research, news, and alerts on the products that matter most.
- **ITSM Tickets and Workflows** Create ServiceNow or BMC Remedy tickets to track vulnerabilities from advisory to remediation.

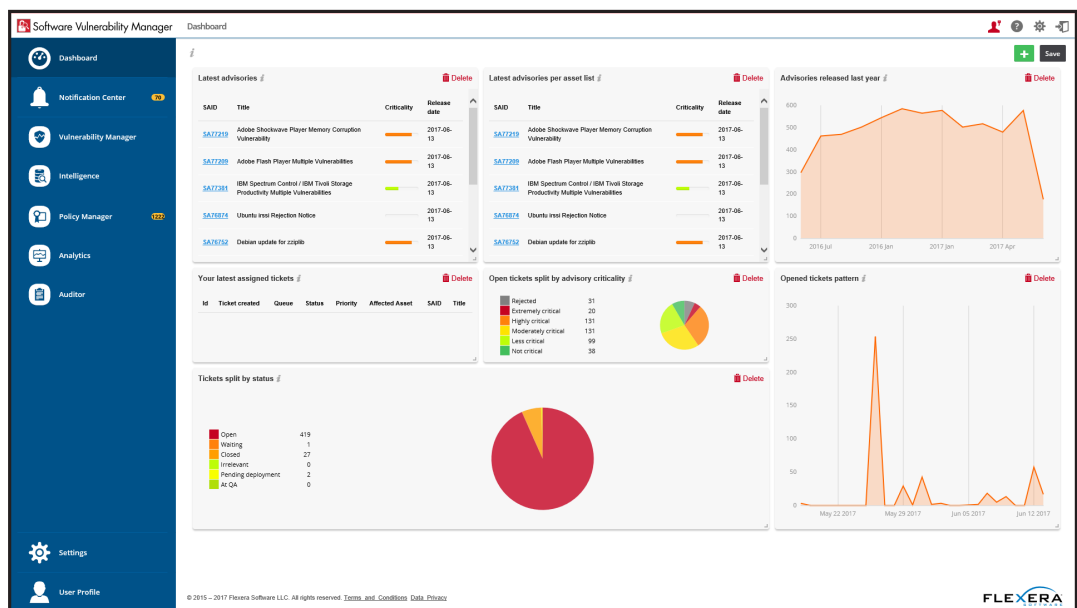

Figure 1: Software Vulnerability Manager Research Shows Advisories by Month, Criticality, Patch Status, and More

Software Vulnerability Manager Research

Software Vulnerability Manager Research allows effective reduction of the attack surface for cybercriminals, providing access to verified vulnerability intelligence from Secunia Research covering all applications and systems across all platforms. It drives a prioritized remediation process by handling vulnerability workflows, tickets and alerts, and describes the steps to mitigate the risk of costly breaches.

You Don't Know What You Don't Know

It's hard for enterprise security analysts to get reliable and trusted information about software vulnerabilities and to then identify and filter that data for just the products that matter to their organization. Those challenges lead to wasted time and effort.

In addition to Software Vulnerability Manager Research, Flexera also provides the Software Vulnerability Manager Assessment module to identify vulnerable, unpatched software on desktops, laptops and servers, and the Software Vulnerability Manager Patching module for collaboration with IT Operations and automation of security patch management processes.

How We Help

Verified Intelligence	Secunia Research analyzes hundreds of potential vulnerabilities every day and releases advisories for verified vulnerabilities.
Secunia Advisories	Secunia Research advisories contain detailed information used by Security Analysts to assess risk and determine what actions are needed to keep their business protected from cybercriminals and hackers. Covering applications and systems since 2003, each advisory represents a full picture of the vulnerability in the product, including: <ul style="list-style-type: none"> • CVSS Score • Secunia Research Criticality Rating • How the vulnerability can be exploited • Impact of exploitation • Links to patches and a description of mitigation actions
Coverage of all applications and systems	With one of the largest software vulnerability databases in the market, covering over 55,000 applications and systems across all platforms, we are committed to covering all the applications that our customers manage in their environment.
Comprehensive management	Comprehensive management features drive alerts, risk assessment, mitigation, verification and continuous reporting. Those features make the intelligence provided by Secunia Research actionable and link the steps of the Continuous Software Vulnerability Management Process (Figure 2)
Reports and Dashboards	Reports and Dashboards allow you to analyze performance and give visibility into your information security strategies to management. Reports also provide deep insight into such processes for auditing and compliance check purposes.
Integrations	Software Vulnerability Manager has integration interfaces (APIs) to allow data import, export and custom integrations. We provide out-of-the-box integration with: <div style="display: flex; justify-content: space-around; align-items: center; margin-top: 10px;">  <div style="text-align: center;"> <p><small>FLEXERA SOFTWARE®</small> FlexNet Manager® Suite <small>for Enterprises</small></p> </div>   </div>

Intelligence by Secunia Research@Flexera

Secunia Research is a research team with globally recognized expertise in discovering, verifying, testing, validating and documenting vulnerabilities on tens of thousands of applications and systems. Our experts work under strict ethical guidelines and collaborate with the research community and software producers to guarantee the quality of the vulnerability information they document. They manage and maintain Flexera's proprietary

vulnerability database – one of the largest in the industry – containing records for vulnerabilities since 2003. They publish advisories, and create signatures and packages – vulnerability intelligence – which power Software Vulnerability Manager.

About Flexera Software

Flexera Software helps application producers and enterprises manage application usage and increase the value they derive from their software. Our next-generation software licensing, compliance, security and installation solutions are essential to ensure continuous licensing compliance, optimize software investments and future-proof businesses against the risks and costs of constantly changing technology. Over 80,000 customers turn to Flexera Software as a trusted and neutral source for the knowledge and expertise we have gained as the marketplace leader for over 25 years and for the automation and intelligence designed into our products.
