

TestComplete

The Easiest-to-Use UI Automated Testing Tool
That Tests Every Application Reliably and Accurately

The Only UI Automated Testing Tool With a Hybrid Object Recognition Engine Powered With AI

Test Every Application Using Object Recognition With AI

Expand your test coverage with our unmatched object recognition engine, now with artificial intelligence to detect and test any application. Our hybrid object recognition combines property and AI-powered visual recognition to find dynamic UI elements quickly, easily, and accurately.

Build and Maintain Automated GUI Tests Faster Than Ever

Create complex and scalable automated tests in seconds with Record & Replay capabilities powered by the most accurate and customizable object repository. Dynamically keep up with application updates with our Intelligent Recommendation System to avoid test maintenance headaches.

Don't Start From Scratch: Reuse Your Functional Tests

Instantly increase productivity and scale by reusing your keyword-driven and data-driven tests, creating an automation framework, or by consuming Unit, Selenium, or SoapUI tests. You'll get rid of redundant steps and optimize your functional testing process for maximum test coverage.

TestComplete improved application testing time between 40-50%. It has helped us reduce resource costs by as much as \$350K.

– Sandor Albert, Senior Software Engineer, Philips Healthcare

TestComplete has allowed O'Reilly to easily convert thousands of manual tests to automated tests, seamlessly integrating into our testing ecosystem. TestComplete has allowed my team to scale our automation efforts and make sure we're releasing a high quality product to all of our customers while greatly decreasing our testing cycle.

– Carson Underwood, QA Automation Supervisor, O'Reilly Auto Parts.
