

Change Auditor for Exchange

Real-time auditing for Exchange and Exchange Online

Email has become the predominant business tool for communication within and between organizations. As a result, email serves as a repository of information — some of it sensitive and vulnerable to misuse. Many organizational policy violations go undetected because most security actions are not audited. This can result in lost productivity and system downtime — a risk no organization should take.

Today, companies need in-depth auditing and reporting for Microsoft Exchange Server and Office 365 security and compliance to prove regulatory compliance and drive efficiencies.

Change Auditor for Exchange proactively audits the activities taking place in your Exchange environment, prevents

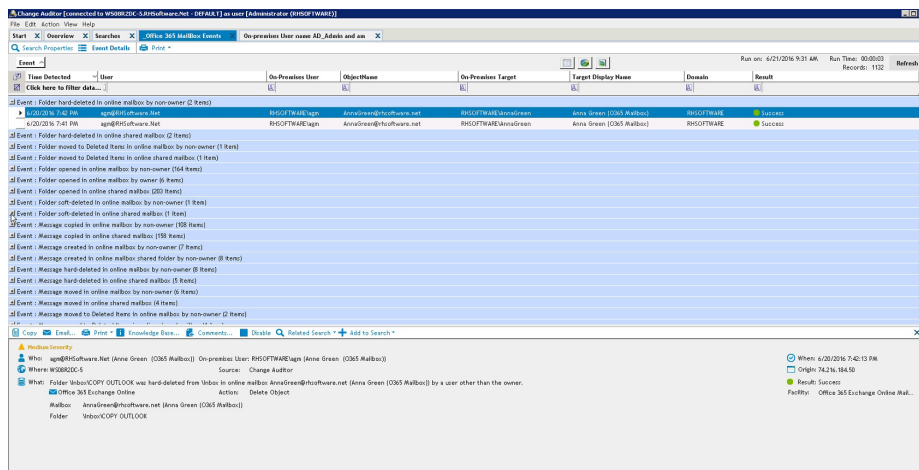

critical mailboxes from being accessed, and provides real-time, detailed alerts when vital changes occur. Continually being in the know helps you to prove compliance, drive security and improve uptime while proactively auditing changes to Exchange Server and Exchange Online configurations and permissions. You'll have the ability to track, alert and report on Exchange and Exchange Online security and policy settings, as well as quickly troubleshoot other problems by automatically collecting all information related to major changes, including the original and current values.

AUDIT ALL CRITICAL CHANGES

Change Auditor for Exchange provides extensive, customizable auditing and reporting for all critical changes to Exchange Server and the hosted

BENEFITS:

- Installs in minutes with fast event collection for immediate analysis of Exchange and Exchange Online environments
- Enables enterprise-wide auditing and compliance from a single client
- Strengthens internal controls by preventing access to sensitive or critical mailboxes and limits control of authorized users
- Reduces security risks by sending real-time alerts to any device for immediate response
- Eliminates unknown security concerns, ensuring continuous access to Exchange and Exchange Online configurations, mailboxes and users by tracking all events and those changes related to specific incidents
- Drives availability by enabling proactive troubleshooting of changes to policies and Exchange public folders
- Reduces the performance drag on servers and saves storage resources by collecting events without the use of native auditing
- Streamlines compliance reporting for internal policies and external regulations, including SOX, PCI DSS, HIPAA, FISMA, SAS 70 and more
- Turns information into intelligent, in-depth forensics for auditors and management

SYSTEM REQUIREMENTS

For a full list of detailed requirements, please review the [Release Notes Guide](#).

Exchange component of Office 365, including administrative groups, mailbox policies, public and private information store auditing, organizational changes such as ActiveSync mailbox policy changes, distribution list changes and more. You'll get complete visibility into all changes over the course of time and in chronological order with in-depth forensics on who, what, where, when, why and from which workstation, including any related event details with before and after values. And, with real-time alerts to any device, you'll maintain constant awareness of and the ability to respond to vital policy changes as they occur, reducing the risks associated with day-to-day modifications.

TRACK USER ACTIVITY AND PROTECT SENSITIVE MAILBOXES

Change Auditor for Exchange helps tighten enterprise-wide auditing and compliance policies by tracking user and administrator activity for user account and delivery restriction changes. Change Auditor also prevents unauthorized users from gaining access to mailboxes and provides information on administrators and users who have gained access into another user's mailbox. You'll see exactly who accessed, deleted, copied, moved or created emails from that mailbox. With 24x7 real-time alerts, in-depth analysis and reporting capabilities, your Exchange and Exchange Online infrastructures are protected from exposure to suspicious behavior or unauthorized access, and are always in compliance with corporate and government standards.

AUDIT MOBILE DEVICES WITH ACTIVESYNC

Use Microsoft's ActiveSync technology to audit mobile devices and track email and calendar access, device registration and more.

TURN IRRELEVANT DATA INTO MEANINGFUL INFORMATION TO DRIVE SECURITY AND COMPLIANCE

Change Auditor for Exchange tracks critical changes to your Exchange and Exchange Online environments, then

translates raw data into meaningful intelligent data to help safeguard the security and compliance of your infrastructure. Auditing limitations become a thing of the past due to Change Auditor's high-performance auditing engine, and without the need for native audit logs, you see faster results and savings of storage resources.

AUTOMATE REPORTING FOR CORPORATE AND GOVERNMENT REGULATIONS

Utilizing Microsoft's SQL Reporting Services (SRS), Change Auditor for Exchange provides clean, meaningful security and compliance reports on the fly. With a built-in compliance library and the ability to build your own custom reports, proving compliance for standards such as Sarbanes-Oxley (SOX), Payment Card Industry Data Security Standard (PCI DSS), Health Insurance Portability and Accountability Act (HIPAA), Federal Information Security Management Act (FISMA) and Statement on Auditing Standards No. 70 (SAS 70) is a breeze.

ABOUT QUEST

Quest helps our customers reduce tedious administration tasks so they can focus on the innovation necessary for their businesses to grow. Quest® solutions are scalable, affordable and simple to use, and they deliver unmatched efficiency and productivity. Combined with Quest's invitation to the global community to be a part of its innovation, as well as our firm commitment to ensuring customer satisfaction, Quest will continue to accelerate the delivery of the most comprehensive solutions of Azure cloud management, SaaS, security, workforce mobility and data-driven insight.
