

Change Auditor for SharePoint

SharePoint auditing tool tracks, reports on and alerts on changes

Microsoft® SharePoint® contains important and sensitive information, such as HR data, financial records and customer documentation. As SharePoint grows, monitoring and auditing SharePoint activity for compliance and security requirements becomes more critical. Unfortunately, the native SharePoint audit log is incomplete and difficult to use when it comes to satisfying auditor requests, which can distract administrators from working on other projects and lead to fines and organizational embarrassment.

Many organizational policy violations go undetected because most security actions are not audited, which can result in lost productivity and system downtime. Moreover, because native tools can't prevent or even track site deletions,

you could lose log data — defeating the purpose of auditing in the first place.

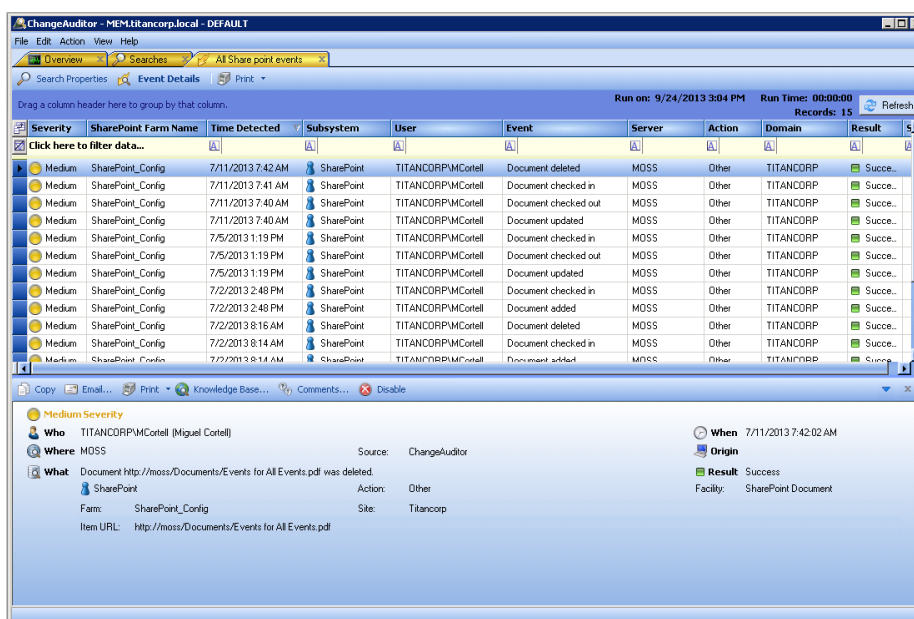

Change Auditor for SharePoint makes SharePoint auditing faster, easier and much more secure. It tracks, audits and reports on critical SharePoint changes in real time. It stores event data in one centralized and secure database, and translates that raw data into intelligent, in-depth reports to protect against policy violations and deliver the SharePoint governance organizations need today. With Change Auditor for SharePoint, you'll have confidence knowing that your organization can pass its next audit.

AUDIT ALL CRITICAL CHANGES

Change Auditor for SharePoint provides extensive, customizable auditing and reporting for all critical changes to

BENEFITS:

- Ensures a secure and compliant SharePoint environment by tracking all critical changes and related events in real time
- Enables enterprise-wide auditing and compliance from a single client
- Stores all audit data in one secure, centralized database
- Delivers faster time to resolution by enabling administrators to group, sort and filter search results
- Includes pre-configured, customizable reports that satisfy many auditor and management requests
- Reduces security risks with real-time alerts to any device for immediate response

Meet your audit requirements with Change Auditor for SharePoint. Get all related events on the who, what, when and where of each change, and add comments on why the change was made.

SharePoint, including configuration settings, permissions, farms, servers, site collections, lists, documents and users. You'll get complete visibility into all changes over the course of time and in chronological order on who, what, when, where, why and workstation, including any related events with before and after values.

TRACK USER ACTIVITY AND REDUCE SECURITY RISKS

Change Auditor for SharePoint helps protect against system performance issues and unwanted security gaps by tracking user and administrator activity. You'll see exactly who accessed, deleted, moved, created or modified settings and data. And with real-time alerts to any device, you'll maintain constant awareness of any suspicious behavior and the ability to respond to threats as they occur.

TURN IRRELEVANT DATA INTO MEANINGFUL INFORMATION TO DRIVE SECURITY AND COMPLIANCE

Change Auditor for SharePoint eliminates guesswork analysis reporting by translating isolated cryptic data into a series of meaningful events. You'll instantly get all information on the change you're viewing and all related events, such as what other changes came from specific users. You will also

gain a better understanding of event trends with the ability to view, highlight and filter related events over the course of days, months and even years.

AUTOMATE ROLE-BASED REPORTING FOR INTERNAL POLICIES AND MANAGEMENT REQUESTS

Change Auditor for SharePoint provides pre-configured and customizable reports with dashboards for auditors and management to view the information they need based on their level of access. This intuitive reporting eases workload on administrators and enables them to focus on other projects.

ABOUT QUEST

Quest helps our customers reduce tedious administration tasks so they can focus on the innovation necessary for their businesses to grow. Quest® solutions are scalable, affordable and simple-to-use, and they deliver unmatched efficiency and productivity. Combined with Quest's invitation to the global community to be a part of its innovation, as well as our firm commitment to ensuring customer satisfaction, Quest will continue to accelerate the delivery of the most comprehensive solutions for Azure cloud management, SaaS, security, workforce mobility and data-driven insight.
