

with before and after values. And, with real-time alerts to any device, you'll maintain constant awareness and the ability to respond to vital changes as they occur.

TRACK USER ACTIVITY

Change Auditor for SQL Server helps tighten enterprise-wide auditing and compliance policies by tracking user and administrator activity, such as database additions and deletions, granting and removing SQL Server access and more. With in-depth analysis and reporting capabilities, your SQL Server infrastructure is protected from exposure to suspicious behavior or unauthorized access, and is always in compliance with corporate and government standards.

TURN IRRELEVANT DATA INTO MEANINGFUL INFORMATION TO DRIVE SECURITY AND COMPLIANCE

Change Auditor for SQL Server eliminates guesswork analysis reporting by translating isolated cryptic data into a series of meaningful events. You instantly get all information on the change you're viewing and all related events such

as what other changes came from specific users. You will also gain a better understanding of event trends with the ability to view, highlight and filter related events over the course of days, months and even years.

AUTOMATE REPORTING FOR CORPORATE AND GOVERNMENT REGULATIONS

Utilizing Microsoft's SQL Server Reporting Services, Change Auditor for SQL Server provides clean, meaningful security and compliance reports on the fly. With a built-in compliance library and the ability to build your own custom reports, proving compliance for standards such as Sarbanes-Oxley (SOX), Payment Card Industry Data Security Standard (PCI DSS), Health Insurance Portability and Accountability Act (HIPAA), Federal Information Security Management Act (FISMA) and Statement on Auditing Standards No. 70 (SAS 70) is a breeze.

AUDIT DATA-LEVEL EVENTS

Change Auditor for SQL Server audits changes to databases and tables. Events that can be audited include additions, removals and changes to

rows, procedures, tables, views, triggers and more. All changes provide robust details about the change, including the who, what, when, where and originating workstation details. The tool also schedules both the archiving of older data to an archive database, enabling organizations to keep critical and relevant data online while improving the overall performance of search and data retrieval.

ABOUT QUEST

Quest helps our customers reduce tedious administration tasks so they can focus on the innovation necessary for their businesses to grow. Quest® solutions are scalable, affordable and simple-to-use, and they deliver unmatched efficiency and productivity. Combined with Quest's invitation to the global community to be a part of its innovation, as well as our firm commitment to ensuring customer satisfaction, Quest will continue to accelerate the delivery of the most comprehensive solutions for Azure cloud management, SaaS, security, workforce mobility and data-driven insight.

SYSTEM REQUIREMENTS

For complete system requirements, please visit quest.com/products/change-auditor-for-sql-server.

Change Auditor for SQL Server sends critical change and pattern alerts to email and mobile devices to prompt immediate action, enabling you to respond faster to threats even when you're not on site.
