"We use MindManager as a meeting management tool, a project planner, and an information-management system, and it has cut presentation preparation time in half."

– Staff Scientist, DuPont Genencor

Work better & faster together

Trade unproductive meetings and unreliable message threads for a comprehensive map that instantly clarifies goals, expectations, requirements, tasks & priorities.

- Transform a dynamic brainstorm into an executable strategy in a single team session.
- Share meeting notes, processes and plans across the organization to drive understanding, alignment and buy-in.
- Ensure your projects are aligned with larger corporate objectives.
- Save and share maps within Dropbox, Google Drive, OneDrive, or Box.

Plan & manage masterfully

Avoid the pitfalls that cause projects to fail with advanced project management tools that your helps put your entire team on the actual same page from Day One.

- Define scope, requirements, and expectations and track progress in one transparent communication.
- View projects by resource, tasks, timeline, Gantt Pro and more for 360-degree visibility into status, red flags and risks.
- Effortlessly balance big-picture project goals with the details that make it all come together.

Centralize & simplify execution

Robust Microsoft integrations, and available integration with 800+ apps, enable team members to operate from a single portal that saves time & supports accuracy.

- Query and visualize information from multiple SharePoint sites in a single dashboard.
- Easily command large amounts of data with powerful search, filtering and indexing tools.
- Connect and correlate files, links, media, notes and more, to create rich, comprehensive, shareable plans and knowledge repositories.
